IBM

## PROFILE

Dedicated student pursuing a Bachelor of Computer Applications at SDJ International College, proficient in programming languages such as Flutter, Python, and C++, alongside web development tools like HTML and CSS, which support a solid foundation in Information Technology. Eager to apply skills to innovative projects, helping solve real-world challenges while contributing to a dynamic work environment.

## PROJECT

### WordWave - E-Library System (Academic Project)

Developed a cross-platform e-library system for both mobile and web platforms, allowing users to browse, borrow, and read books for a specific time period after secure payment. Integrated modules for login, signup, profile management, book search, and purchased book tracking. Focused on creating a responsive interface with smooth navigation and efficient data handling for a seamless reading experience.

**Technologies:** Kotlin · XML · SQLite · HTML · CSS · JavaScript · PHP

**GitHub:** [github.com/yashitaliya/WordWave](https://github.com/yashitaliya/WordWave)

### ChatBuddy - Real-Time Chat Application (Personal Project)

Built an Android-based chat application that enables secure, real-time one-on-one messaging between registered users. Implemented Firebase Authentication for secure login and Realtime Database for instant message delivery and synchronization. Designed a modern and responsive chat interface with fast performance, read status updates, and smooth transitions to enhance user interaction.

**Technologies:** Java · XML · Firebase Authentication · Firebase Realtime Database · Android Studio

**GitHub:** [github.com/yashitaliya/ChatBuddy](https://github.com/yashitaliya/ChatBuddy)

### TODO App - Task Management System (Personal Project)

Created a Flutter-based cross-platform mobile app to help users manage daily tasks with offline support. Implemented core features like task creation, completion toggle, and swipe-to-delete with persistent local storage using shared\_preferences. Focused on delivering a minimal, intuitive design that prioritizes usability and quick task management even without an internet connection.

**Technologies:** Flutter · Dart · shared\_preferences
